

Submersible motor pumps 2" to 4" for wet well installation

**60 Hz
standard range**

**Stationary installation
Transportable installation**

Other versions on request

1. Applications

KRT submersible motor pumps are used for pumping all types of sewage and effluent in water treatment and industry, especially untreated sewage with long fibrous and solid substances, liquids containing air and gas as well as raw, activated and digested sludge.

2. Operating data

Capacity	Q up to 600 USgpm (140 m ³ /h)
Head	H up to 110 ft (33 m)
Motor Power	P ₂ up to 5 HP (3,6 Kw)
Temperature of pumped liquid	t up to 140° F (60°C)

3. Drive

Three-phase asynchronous motor
200 V, 220 V, 230 V, 380 V, 440 V, 460 V, 575 V
Single-phase asynchronous motor
115 V, 230 V (Motor 02UG only)

4. Material

Standard version in cast iron.

5. Shaft sealing

Mechanical seals being independent of the direction of rotation lubricated with non-toxic oil

6. Bearings

Grease lubricated ball bearings

7. Designation

Example

8. Pump hydraulics

Since no one type of impeller is best suited for all applications, KSB has developed numerous impeller types, casing shapes, and pumps sizes so as to best meet any specific requirement.

KSB's extensive range of recessed, single vane and multivane impellers allows for the selection of an optimum impeller / casing / motor combination that best satisfies the full range of operation requirements of flow, head efficiency, solid size passage, wear resistance, and gas content. KSB offers the right impeller for cost effective and reliable operation.

Closed, non-clogging 2 or 3 vane (K) impeller for highest efficiencies pumping all types of industrial and municipal wastewater. • Raw sewage • Activated & return sludge • Industrial wastewater • Process media • Abrasive laden media • Chemically aggressive media • Stormwater	 K Impeller	Pump Model: KRT K 40 TO 700 2" to 30" • Capacities to 39,000 GPM (8,860 m³/h) • Heads to 350 Ft. (107 m) • Free passage to 7. ½ in (190mm) KRT K 600 and 700 / 24" to 26" consult factory all sizes KRT K see type series booklet 2553.523-14
Closed, non-clogging single vane (E) impeller for fluids containing large solids and long fibrous material • Raw sewage • Digested sludge • Return sludge	 E Impeller	Pump Model: KRT E 80 to 200 3" to 8" • Capacities to 4,300 GPM (980 m³/h) • Heads to 120 Ft. (36 m) • Free passage to 5. ½ in (120mm) KRT E 80-251...E 200-401 See type series booklet 2553.523-14
Recessed, non-clogging torque-flow (F) Impeller for fluids containing large solids, long fibrous admixtures, and entrained or dissolved gasses. • Raw sewage • Activated & return sludge • Abrasive laden media • Industrial wastewater	 F Impeller	Pump Model: KRT F 40 to 150 2" to 6" • Capacities to 2,600 GPM (590 m³/h) • Heads to 260 Ft. (80 m) • Free passage to 5.5½ in (135mm) KRT F 100, 150 > 5 hp (>4 kW) See type series booklet 2553.523-14
Cutting and grinding (S) impeller for high Pressure domestic sewage systems Containing long fibrous admixtures. • Effluents • Domestic sewage	 S Impeller	Pump Model: KRT S 40 1 ½" • Capacities to 115 GPM (25 m³/h) • Heads to 260 Ft. (80 m) • Free passage to 9/32 in (7mm) KRT S40-250 See type series booklet 2553.523-14

8. Material version G – KRT < 5 hp (< 4 kW)

KRT 80
With E-Impeller
4-pole (1750 rpm)

Single-vane impellers
3" Discharge

KRT 40, 65, 80, 100
With F-Impeller
2-pole (3500 rpm)
4-pole (1750 rpm)

Vortex impellers
1 ½", 2 ½", 3" & 4" Discharge

KRT 40
With S-Impeller
2-pole (3500 rpm)

Grinder pumps
1 ½" Discharge

For additional hydraulic selections and material combinations see type series booklet 2553.523-14, 2" up to 30".

Fig. 01

9.1 Standard program – KRT < 5 hp (< kW)

Size	Material G
	S,F,E = Impeller types
40-160	F, S
65-200	F
80-200	F, E
100-200	F

Other sizes out of Standard program upon request

**S-F and E- impellers are only available in the diameters shown in the QH curves.
K-impellers will be trimmed to meet the exact duty point.**

Cast iron

Laminate graphite cast iron
(ASTM A 48 Class 35B)

This graphited cast iron is mostly used in the pumping of municipal sewage, sludges and rain-or surface water. Suitable for neutral, slightly aggressive media and media unlikely to cause excessive wear. The pH value of the pumped medium should be 5 to 13
